

People with a medical condition

DriveOn—the driving expert for 40 years

Helping you drive safely and confidently.

For more than 40 years, DriveOn has been helping hundreds of people in Upstate New York get to where they need to go. With customized training in specially-equipped vehicles, or by learning new driving techniques, people of all ages and abilities complete our program with the skills and confidence to drive safely. DriveOn serves the whole community by making driving safer and less stressful for everyone.

In today's world, you know that driving is key to your independence, employment and mobility. We can help you feel safe and confident on the road.

Our experienced and skilled driving professionals will evaluate your driving ability, create a customized program, and train you in a safe, convenient, low-stress environment.

Driver Evaluation

A certified driver specialist will perform a comprehensive, objective assessment to help determine your ability to drive a vehicle safely, with or without adaptive equipment. Your driver evaluation may include the following assessments:

- Knowledge of rules of the road
- Day and night driving vision
- Physical abilities
- Cognitive skills
- Open road driving
- Vehicle consultation

Driver Training

Our specialists will help you obtain or retain your driver's license by training you in a full range of roadway environments. Simulation assessment, used for years to effectively train aviation and military personnel, is a new resource that can pinpoint areas for improvement. Our driving simulator – a first in Rochester – can replicate actual driving circumstances and help you learn how to handle busy intersections, avoid collisions, adapt to winter weather conditions, and respond safely to other risky situations.

To learn more about driving safely and confidently, call **585.271.1894** and ask for DriveOn.

We will work with you to determine whether you are eligible for services sponsored by the NYS Office of Vocational Educational Services (VESID).

DriveOn also has satellite offices in Buffalo, Syracuse and Utica. For referral information, please call **585.271.1894**, or toll-free **1.877.823.7483**.
