

Beginner Driver

DriveOn—the driving expert
for 40 years

Helping your child learn to drive safely and confidently.

For more than 40 years, DriveOn has been helping hundreds of people in Upstate New York get to where they need to go. With customized training in specially-equipped vehicles, or by learning new driving techniques, people of all ages and abilities complete our program with the skills and confidence to drive safely. DriveOn serves the whole community by making driving safer and less stressful for everyone.

If you have a child with learning disabilities, you know those challenges can extend beyond the classroom. When your son or daughter reaches driving age, we can help your child focus on the critical elements: concentration and retention of basic traffic rules and road markings.

We can help your son or daughter learn to drive safely and confidently.

Our experienced and skilled driving professionals will evaluate your son or daughter's learning needs and develop a customized plan for driver training in a safe, convenient, low-stress environment.

Driver Evaluation

A certified driver specialist will perform a comprehensive, objective assessment to help determine your son or daughter's ability to drive a vehicle safely, with or without adaptive equipment. The driver evaluation may include the following assessments:

- Knowledge of rules of the road
- Day and night driving vision
- Physical abilities
- Cognitive skills
- Open road driving

Driver Training

Our specialists will help prepare your son or daughter to obtain a driver's license by training him or her in a full range of roadway environments. Simulation assessment, used for years to effectively train aviation and military personnel, is a new resource that can pinpoint any problem areas. Our driving simulator – a first in Rochester – can replicate actual driving circumstances and help your child learn how to handle busy intersections, avoid collisions, adapt to winter weather conditions, and respond safely to other risky situations.

To learn more about how we can help your son or daughter drive safely and confidently, call **585.271.1894** and ask for the DriveOn Beginner Program.

DriveOn also has satellite offices in Buffalo, Syracuse and Utica. For referral information, please call **585.271.1894**, or toll-free **1.877.823.7483**.
