

Senior Driver

DriveOn—the driving expert for 40 years

Helping you or your loved one drive stress-free and safely.

For more than 40 years, DriveOn has been helping hundreds of people in Upstate New York get to where they need to go. With customized training in specially-equipped vehicles, or by learning new driving techniques, people of all ages and abilities complete our program with the skills and confidence to drive safely. DriveOn serves the whole community by making driving safer and less stressful for everyone.

Driving in busy city traffic, on expressways, at night, or in poor weather conditions can be risky. If you or your loved one have also experienced any decline in vision, reduced strength or mobility, or any physical discomfort, driving can be stressful.

We can help you or your loved one drive stress-free and safely.

Our experienced and skilled driving professionals will evaluate you or your loved one for driving ability, create a customized program, and provide training in a safe, convenient, low-stress environment.

Driver Evaluation

A certified driver specialist will perform a comprehensive, objective assessment to help determine the ability to drive a vehicle safely, with or without adaptive equipment. The driver evaluation may include the following assessments:

- Knowledge of rules of the road
- Day and night driving vision
- Physical abilities
- Cognitive skills
- Open road driving
- Vehicle consultation/Car-Fit evaluation

Driver Training

Our specialists will help you or your loved one retain a driver's license by providing training in a full range of roadway environments. Simulation assessment, used for years to effectively train aviation and military personnel, is a new resource that can pinpoint age-related driving challenges. Our driving simulator – a first in Rochester – can replicate actual driving circumstances and help you or your loved one learn how to handle busy intersections, avoid collisions, adapt to winter weather conditions, and respond safely to other risky situations.

To learn more about driving stress-free and safely, call **585.271.1894** and ask for the DriveOn Senior Program.

DriveOn also has satellite offices in Buffalo, Syracuse and Utica. For referral information, please call **585.271.1894**, or toll-free **1.877.823.7483**.
